2014

Korea

High School

Soongeui Girls' High School

PROJECTS

Olaf-game – JavaScript Application

<https://github.com/sejinniemma/OlafGame-refactoring->

This is a JavaScript game that allows us to interact with objects. Our objective is to save Olaf from the fire. For this project I have used refactoring.

Technologies:

~ JavaScript, JQuery, CSS, HTML5 ~

REJ Airline – PHP and React Application

<https://github.com/sejinniemma/REJ-AirLines>

This project save data in MySQL and read them and show the selected info and check if there is stock available or not. I made this PHP first and then converted it React component.

Technologies:

~ JavaScript, JQuery, CSS, HTML5, PHP, MySQL, REACT ~

Sudoku Game – JavaScript Application

<https://github.com/sejinniemma/Sudoku-Game>

This project generates a Sudoku board depending on the chosen difficulty. Make an number objects, show numbers on the board dynamically, maker timer.

Technologies:

~ JavaScript, JQuery, CSS, HTML5 ~

Mole Game – JavaScript Application

<https://github.com/sejinniemma/MoleGame>

The moles game, catch as many moles as you can before the time runs out. If the page is refreshed the game continues without being interrupted

Technologies:

~ JavaScript, CSS, HTML5 ~
